

Securely Message Patients Directly from your EMR (and send files too!)

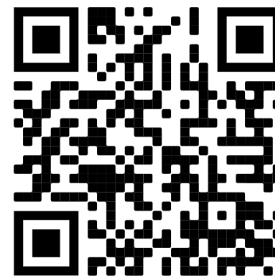

- HIPPA Compliant & Secure
- Unified messaging with your patients
- Save minutes in every appointment

"I introduced the messenger feature to the docs and they all love it! The MOAs do too – one physician who usually creates a large number of ticklers had created just one as the rest were dealt with through email/ SMS. Big workflow saving, so many thanks and please pass along the positive feedback," -- A new Cortico user
